EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Melvin Kraus on October 1, 2004.

The application has been amended as follows:

Please amend claims 6, 9, 10, 11, 12 and 16 as follows:

6. (currently amended) The liquid crystal display apparatus according to claim 4 claim 5,

wherein in each pixel, said first pixel electrode and said common electrode are linear and are arranged substantially in parallel, and
at least part of said second pixel electrode overlaps said first pixel electrode or said common electrode.

9. (currently amended) The liquid crystal display apparatus according to claim 4 claim 5,

wherein said first pixel electrode and said common electrode are linear and are arranged substantially in parallel, and
said second pixel electrode is located below said first pixel electrode and said common electrode, said second pixel electrode overlaps said first pixel

electrode and said common electrode, and insulated films are disposed between said second pixel electrode and said first pixel electrode and between said second pixel electrode and said common electrode.

10. (currently amended) The liquid crystal display apparatus according to
claim 4 claim 5,

wherein said first pixel electrode and said second pixel electrode are linear and are arranged substantially in parallel, and
said common electrode is located between said first pixel electrode and said second pixel electrode.

11. (currently amended) The liquid crystal display apparatus according to
claim 4 claim 5,

wherein said first and said second pixel electrodes are linear and are arranged substantially in parallel, and
at least part of said common electrode overlaps said first or said second pixel electrode.

12. (currently amended) The liquid crystal display apparatus according to
claim 4 claim 5,

wherein said first and said second pixel electrodes are linear and are arranged substantially in parallel, and
said common electrode is located below said first and second pixel

electrodes, said common electrode overlaps said first and said second pixel electrodes, and insulated films are disposed between said common electrode and said first pixel electrode and between said common electrode and said second pixel electrode.

16. (currently amended) The liquid crystal display apparatus, comprising:
 - a first substrate;
 - a second substrate arranged opposite the first substrate;
 - a liquid crystal layer sandwiched between said first substrate and said second substrate; and
 - a plurality of pixels which are sandwiched between said first substrate and said second substrate and form a display section,
 - wherein each of said pixels is provided with a first pixel electrode and a second pixel electrode both corresponding to said pixel, and a common electrode corresponding to said first and second pixel electrodes;
 - wherein said first and said second pixel electrode electrodes are disposed on said first substrate, and said common electrode is disposed on one of said first substrate and said second substrate;
 - wherein said first and said second pixel electrodes are linear and are arranged substantially in parallel; and
 - wherein said common electrode overlaps said first and said second pixel electrodes.
